# UN1TY HDMI TV DEVICE

## USER-GUIDE

**V1.0**

USB port for Keyboard/Mouse

mini-USB port to connect to power supply or TV USB port for TV power

connect directly to TV HDMI port or via HDMI extension cable

reset button

mini-SD card port

mini-USB port for external memory

# QUICK CONNECT

1. Plug the HDMI TV device directly into the TV's **HDMI** socket or via the HDMI extension cable if required.

2. Connect your **Keyboard/Mouse** remote control to the USB port

3. Connect the device to a USB port on your TV or the included **power supply**.

4. Select the HDMI channel on your TV and follow **on-screen menu** for first-boot to set up the device and wireless connection.

**Note:** The UN1TY app is pre-installed on your device along with other apps. After the first-boot, your device can also be used similar to a PC. **Enjoy.**

# USING THE UN1TY APP

1. In the **WELCOME** screen, select your location.

2. Select your **WI-FI** and enter password.

3. Enter Google settings (optional)

4. Personalise device (enter your names)

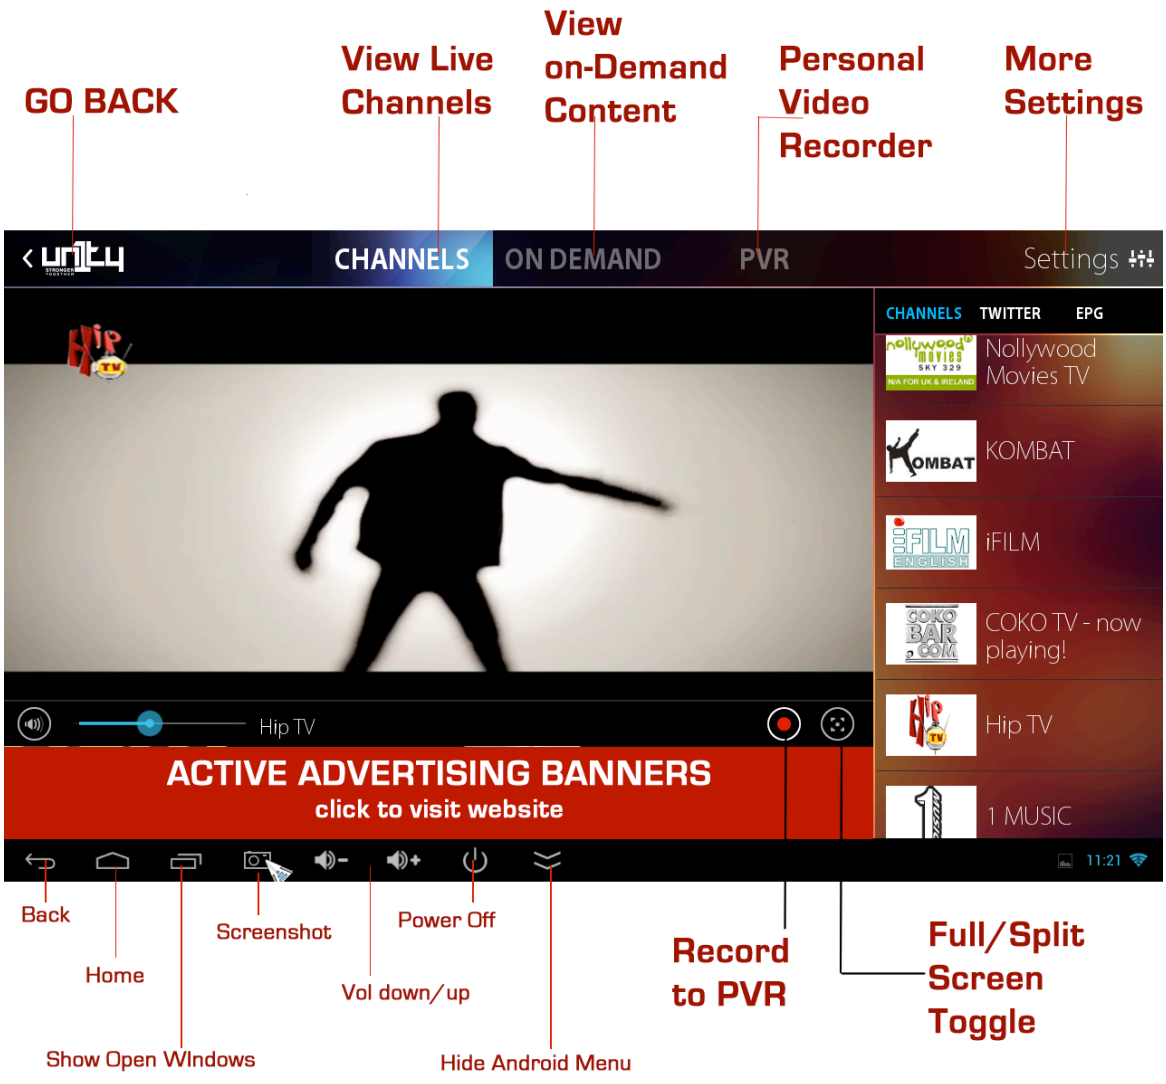
5. Login into app with your existing **username/password** or sign-up for a new account if you are not an existing user.

6. Select Provider (usually DEFAULT except your ISP is listed).

**Notes:** You should see the screen as shown below.

The **BUY CHANNELS** button can be used to purchase premium channels when available.

# THE UN1TY APP INTERFACE



# APP FUNCTIONS

## CHANNELS | ON DEMAND | PVR

CHANNELS - access to available LIVE TV channels

ON DEMAND - access to the videos on-demand (free/paid)

PVR – Personal Video Recorder

## CHANNELS | TWITTER | EPG

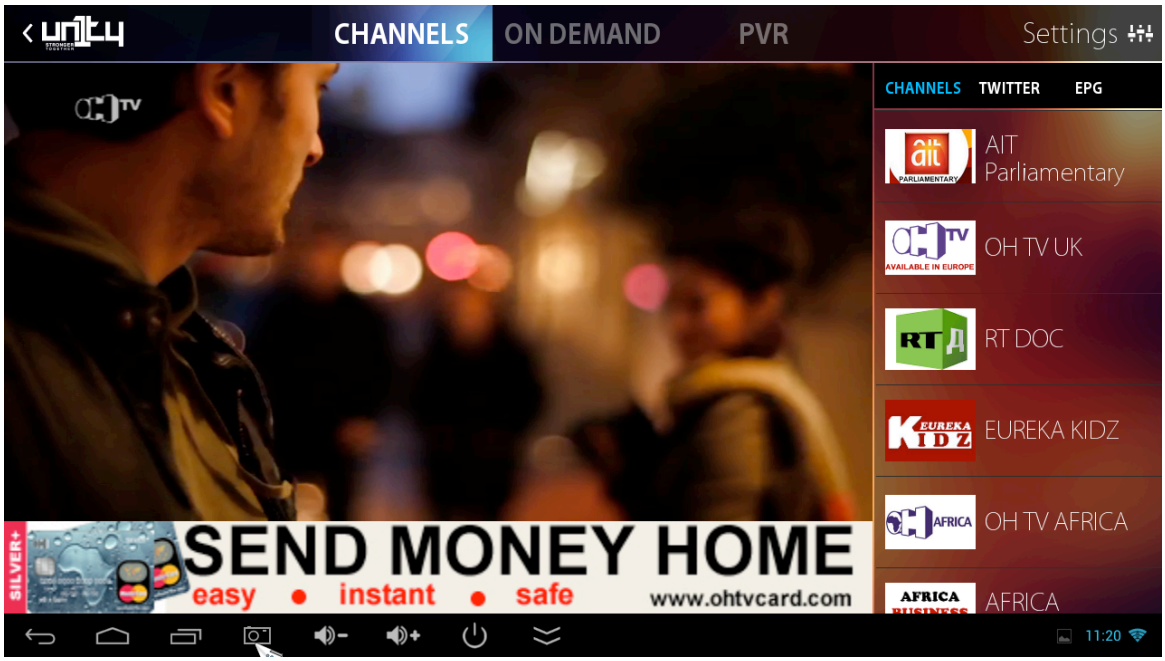
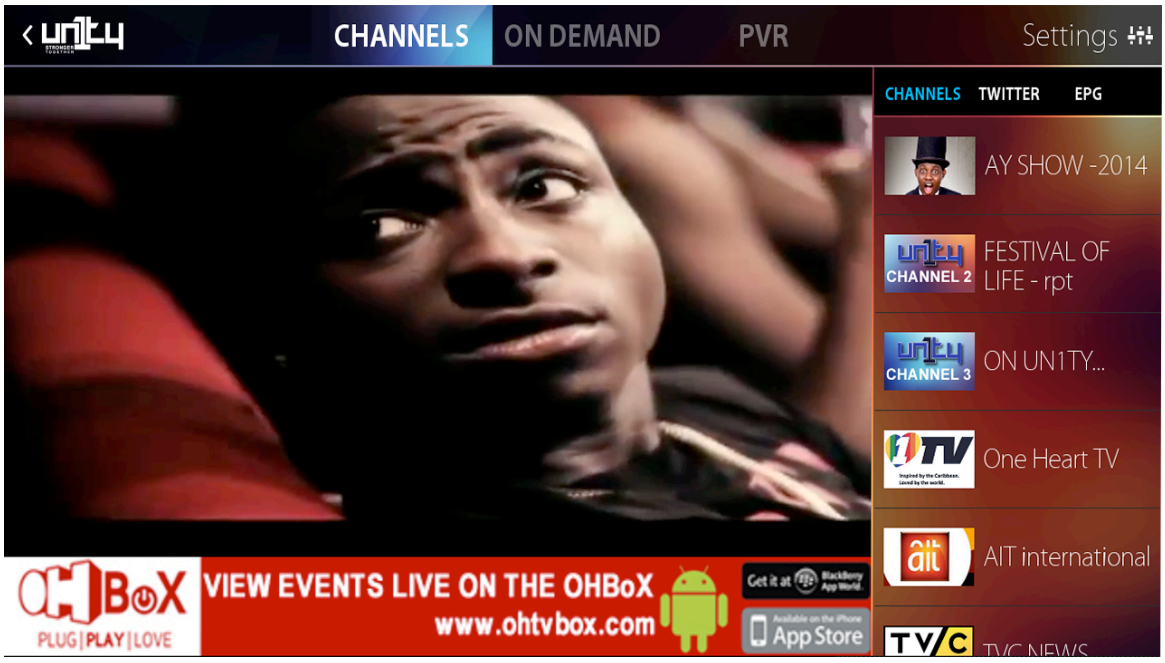
CHANGE PROVIDER – select another ISP

CHANGE FONT SIZE – change in-app twitter font size

MY WALLET – display account credits / purchase points.



**SCROLLING CHANNELS LIST ON RIGHT-HAND PANEL**



**DYNAMIC ON-SCREEN BANNER ADVERTISING**

# NOTES

1. In-app payments are via credit cards/PAYPAL

2. You can also LOGIN at http://www.un1ty.tv to make purchases

3. Purchases made are immediately available on ALL your devices

4. A maximum of TWO devices can be simultaneous logged in to the same account

5. All purchased onDemand content are on a rental basis and will expire 48 hours after first viewing.

6. HDMI device also functions similar to a PC and so other Android apps can be installed. We however advise caution.

7. For viewers in Africa, the SELECT PROVIDER function enables you to select the ISP you are currently connected through (if listed) to the Internet. The correct selection will reduce your bandwidth cost. All other users should select DEFAULT.

8. Comments and support requests can be sent to support@un1ty.tv

9. Inform your friends and family about the app as the more subscribers we have, the cheaper our content.

10. Registered users will always receive app-update notifications.
